Hi Richard. Sorry for our delay — my fault entirely. We think your response looks good and we gave no notes or changes.

Good afternoon -- I wanted to share below as a draft response EPA has developed to a Lakewood, Colo.

## Ex. 5 Deliberative Process (DP)

Please let us know by **next Tuesday 11/23** if you have any edits, comments or concerns with below.

Thanks in advance...

Rich Mylott

**COMMENT from** Ex. 6 Personal Privacy (PP) **Lakewood, Colo.**

I recently purchased a home in the Eiber neighborhood of Lakewood, CO. I came under notice of a severe air pollutant, Terumo BCT located less than a mile west of my new home. After extensive research, I must request your help. The site releases a substantial amount of EtO into the atmosphere, putting thousands of people at risk. There's is even an elementary school less than a mile east of the site as well. With the updated exposure limits for ethylene oxide in ambient air recently reduced to 11 parts per trillion, I firmly believe it is time for the EPA to step in and demand shuttering or relocation of this site, if Terumo insists on using EtO. It is especially concerning that there is no EtO measuring instrument that can measure ambient concentration at the PPT level. This furthers the case to either temporarily or permanently shut the location until proper measurements can be taken. Please take this as seriously I take my health. Thank your for your time.

#### **DRAFT RESPONSE**

Thank you for your email sharing concerns regarding ethylene oxide emissions from Terumo BCT.

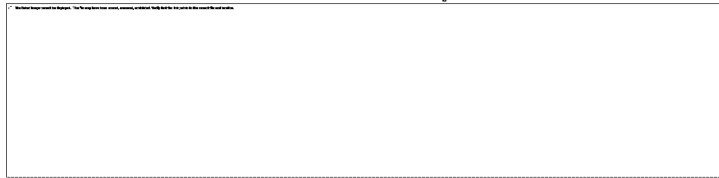

## **Ex. 5 Deliberative Process (DP)**

# Ex. 5 Deliberative Process (DP)

Thanks again for contacting us. You can find the most current information about EPA's rulemaking (and additional information related to EtO) here <https://www.epa.gov/hazardous-air-pollutants-ethylene-oxide>, as this website is updated regularly. Rich Mylott, in EPA's Region 8 office in Denver, 303-312-6654, is also available to help with any additional info you might need.
